Saudi Arabia

## EXPERIENCE

---

### Infrastructure Security Engineer

October 2025 – Present

Saudi AVITO Information Technology Limited Company

King Fahd International Airport, Dammam, Saudi Arabia

- Support and maintain mission-critical IT infrastructure within a highly available enterprise environment, ensuring operational stability, service availability, and business continuity.
- Administer Active Directory services, including user provisioning, access management, Group Policy administration, identity governance, and security-related account controls.
- Configure and maintain essential network services including DNS, DHCP, and TCP/IP to support reliable connectivity and secure network operations.
- Monitor, analyze, and troubleshoot infrastructure, network, and system incidents to minimize service disruptions and improve operational performance.
- Apply information security best practices including access control, identity protection, account security, and compliance with organizational security policies.
- Support secure infrastructure operations through risk mitigation activities, operational security controls, and security awareness practices.
- Perform Windows system administration activities including system configuration, maintenance, updates, performance monitoring, and troubleshooting.
- Participate in incident management processes and collaborate with technical teams to restore services and maintain operational continuity.
- Contribute to infrastructure optimization initiatives, operational improvements, and service reliability enhancements.
- Utilize infrastructure monitoring and troubleshooting tools to analyze system performance and maintain stable IT operations.

### Information Security Specialist

October 2021 – November 2025

Ministry of Islamic Affairs, Dawah and Guidance

Al Baha, Saudi Arabia

- Supported information security operations and assisted in maintaining secure IT environments.
- Participated in network monitoring activities and infrastructure security practices.
